K2 PERFORMANCE STARTER KIT FOR ONE FENCER

This is a top quality and more future proof version of the K1 starter kit. If you think fencing is the sport for you then this is the kit for you with a better weapon, a high quality front zip jacket and a mask and glove that will also be suitable for electric Foil or Epee.

The kit will provide you with many years of good service as all the items are manufactured in the UK to the highest specifications. Although you can buy starter kits for less often you will find they don't come with a plastron or a bag.

Plastrons are an essential part of your equipment as they provide extra protection and the British Fencing Association recommend that no one fences without one.

Richard Kruse VS. Laurence Halsted
both U20 European Champions

Price: £199.00 Including VAT at 17.5%

KIT CONTENTS;

FOIL: 4PE or 5PE Paul Etoile blade with either a Leather French handle or Plastic Pistol grip. Our basic blade is made from UK sourced low carbon steel and is tempered after forging and then heat-treated to relieve stress. It is an extremely rugged blade with a very low incidence of surface defects. Size 3 available for under 13's. Most students start fencing with a traditional French grip, so if you are in any doubt this is the grip to select.

MASK: F100, This is by far our most popular mask. It is coated with a durable layer of nylon which insulates it from your lamé jacket, making it suitable for electric foil. For beginners who think they are likely to progress on to electric foil the extra investment is well worth it in the long term. Approximate sizes [circumference of head around the forehead] as follows: Small Below 22" Below 56 Cm; Medium 22 1/4" to 23" 57-59 Cm; Large 23 1/4" to 25" 59-63 Cm; X-Large 25+ inches 63+ Cm

JACKET: 005, These are all made to the C.E.N Performance Level 1 350 Newtons standard. This range has a panel of stretch material in the back, which improves comfort and range of movement. The jacket has a front zip and is tailored differently for men and women. The womens jackets come with integral pockets for chest protectors. Please note Junior clothing is cut for children under 5 feet tall.

Clothing: All our clothing sizes (unlike most highstreet stores) refer to the actual chest and waist measurements in inches. It is therefore advised that you measure your chest with a full breath of air or waist size before ordering [chest size is measured around the fullest part of the chest and waist size is measured just above the hips] rather than using your normal jacket or trouser size.

PLASTRON: 53, 100% cotton These are all made to the C.E.N Performance Level 1 350 Newtons standard. Plastrons are designed to help protect the fencer. The seams of the plastron are specifically placed at different places to those on the jacket. This is because clothing is most vulnerable at the stitching, placing the stitching so that it doesn't match up ensures extra security. Plastron: Small is up to chest size 35", Medium is 36"-40", Large is 42"-46" and Extra large is above 46".

GLOVE: 121, Suitable for electric or non electric foil and epee and non electric sabre. Machine washable at 40 degrees C, It has extra padding on the back of the hand to prevent bruising of the knuckles. This glove contains stretch material, hand sizes tend to relate to shoe sizes, so Extra Small is for a small child approximately equivalent to foot size 1-2 UK Small is approximately 3-5, Medium is approximately 6-8.5, Large is approximately 9-11 and Extra large above 12

BAG: 44, Allkit which will easily accommodate all of the equipment with room for more if needed.
