

**TT10 TEST BOX FOR WEAPONS AND BODYWIRES**

Using the light chart below in conjunction with this information below to complete a successful test. Please note the blank circles on the chart represent no light.

**2** To check the tester press button 1 on the box to see bulbs and batteries are working.

**1** For Body Cords/Filis de Corps insert cord plugs into socket, for Epee use sockets 2 and 3, for Bayonet foil cords use sockets 2, 5 and 6 and for 2 pin foil cords 2, 4 and 6.

**3** For testing a foil insert the three pin plug of the Body Cord/Filis de Corps into socket 2 on the tester. Please note no other connections are needed when testing a foil.

For testing an epee insert the three pin plug of the Body Cord/Filis de Corps into point 2 on the tester. Please note no other connections are needed when testing an Epee only.

*Lights displayed as seen on the left column show item under test is fully working.*  
*Lights displayed as seen on the right column show as described.*
